Mr. Schultz’s IB Chemistry Study Guide

Study Requirements for Success:

• You will not be successful on exams in my class or in college if you don’t follow the items below.
• Reading through your notes is not studying.
• Studying by yourself is not the most effective, find strength in numbers.
• Make flash cards, re-write your notes and practice the math problems.
• Explaining something to your classmates truly exposes how much you really know.

Date of Exam: _______________________________________
Unit Title: _______________________________________

List the material/topics covered on the exam?

_______________________________________________________________________________________________________________________
_______________________________________________________________________________________________________________________
_______________________________________________________________________________________________________________________
_______________________________________________________________________________________________________________________

List the calculations included on the exam.

_______________________________________________________________________________________________________________________
_______________________________________________________________________________________________________________________
_______________________________________________________________________________________________________________________
_______________________________________________________________________________________________________________________

Determine what topics from above you need to review. Make a list and check them off as you study.
